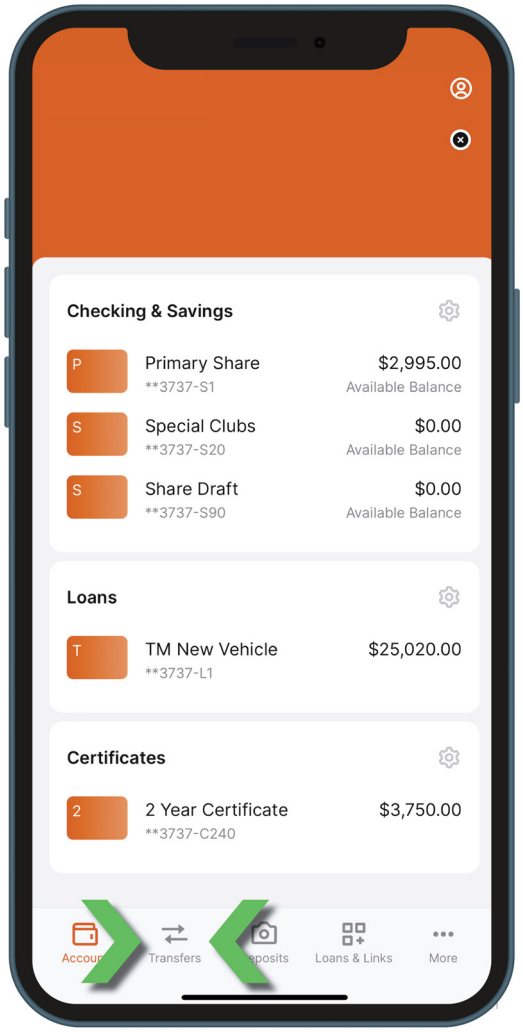
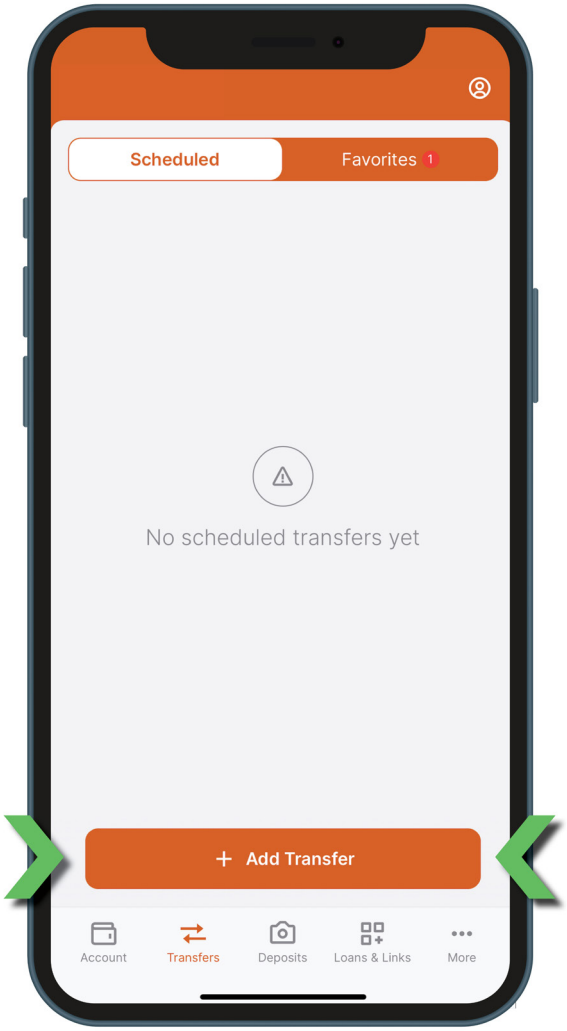
How to Make a Transfer

Making a transfer is still just as easy as before, only now,
you can choose between two different looks!

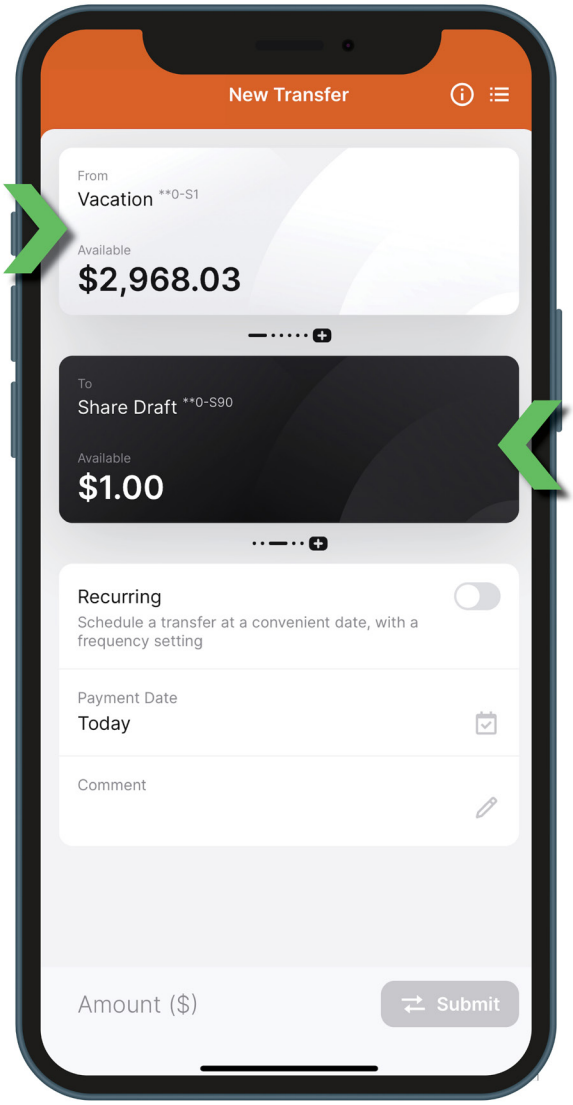
Here are some simple, step-by-step directions:

To create a new transfer, tap “Transfers” on the bottom of your screen,
then click + Add Transfer



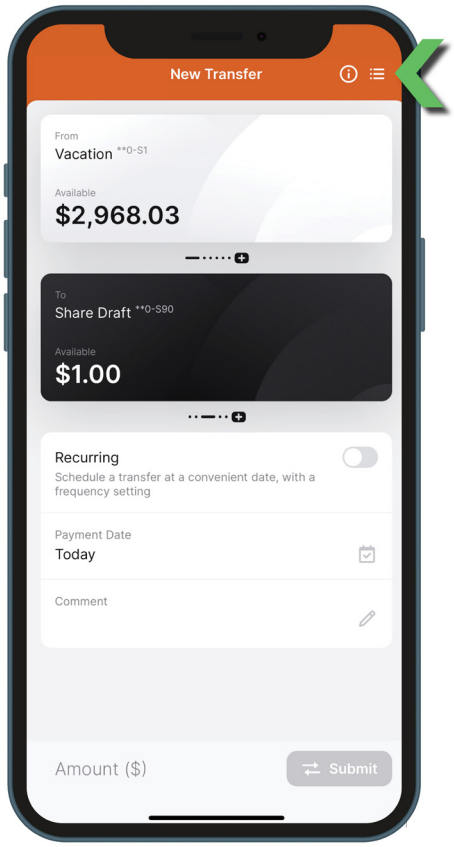


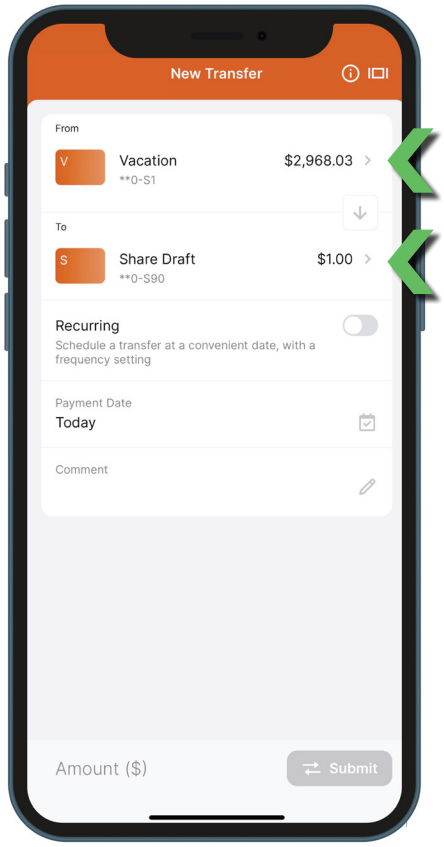
Swipe to select your **From** and **To** suffixes and fill the other fields as desired

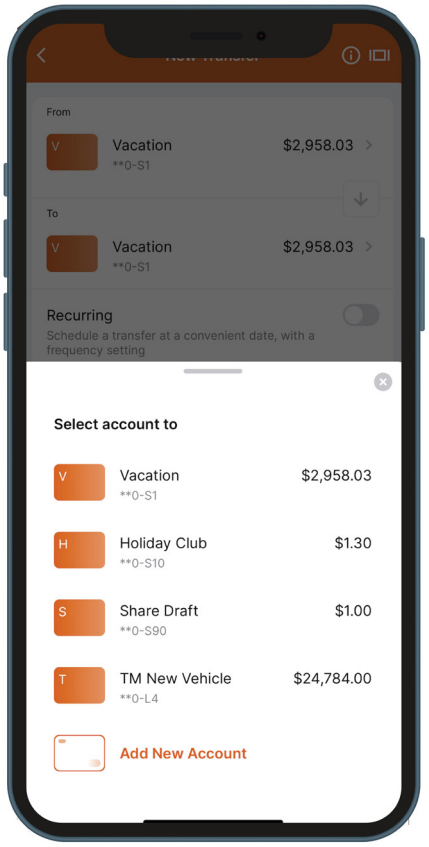


Here's the cool part!

If you prefer the drop-down menu to complete your transfer, simply click on the hamburger icon, to switch from tile view to drop-down view, then proceed as you normally would.

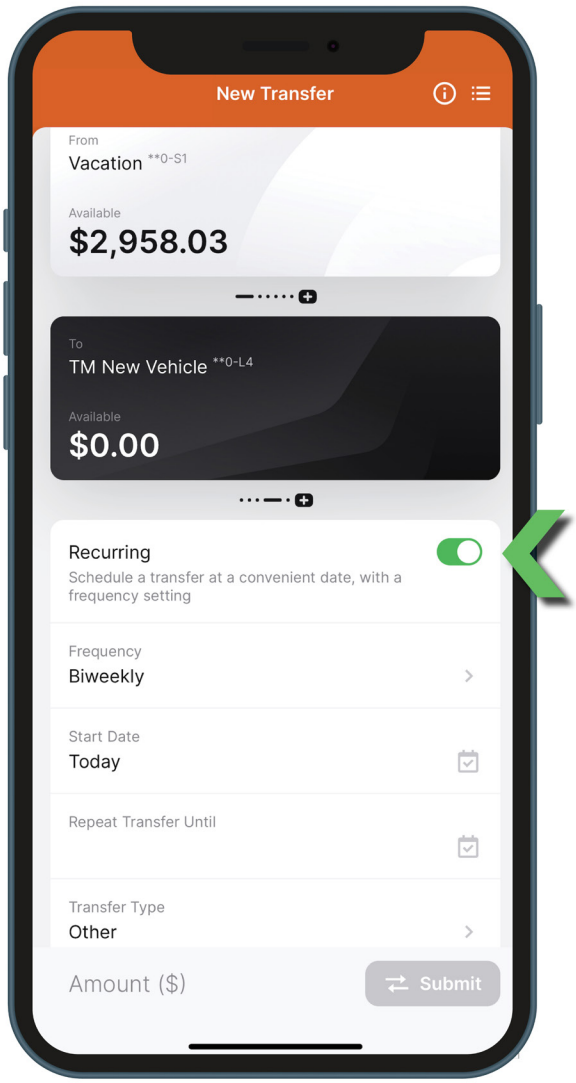






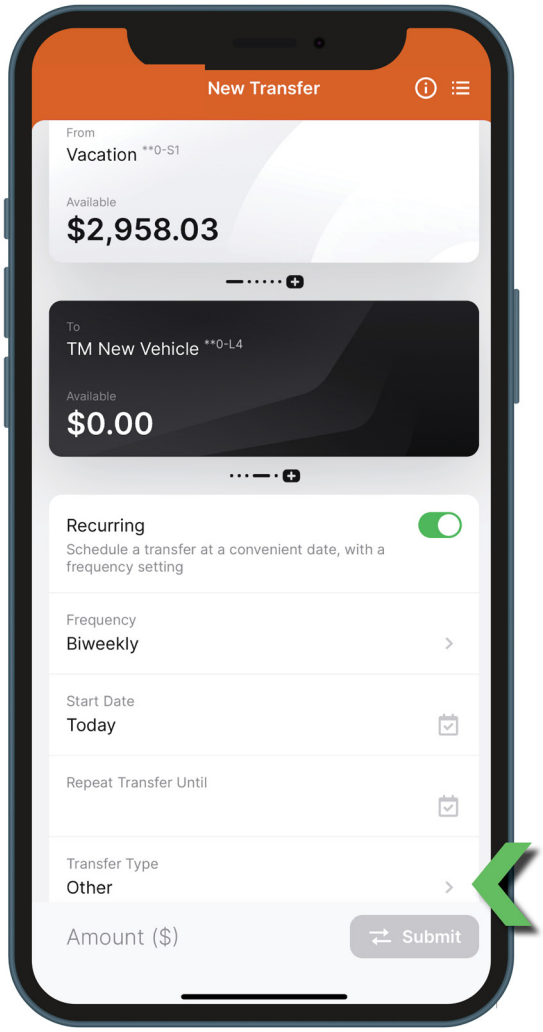
Recurring Transfers

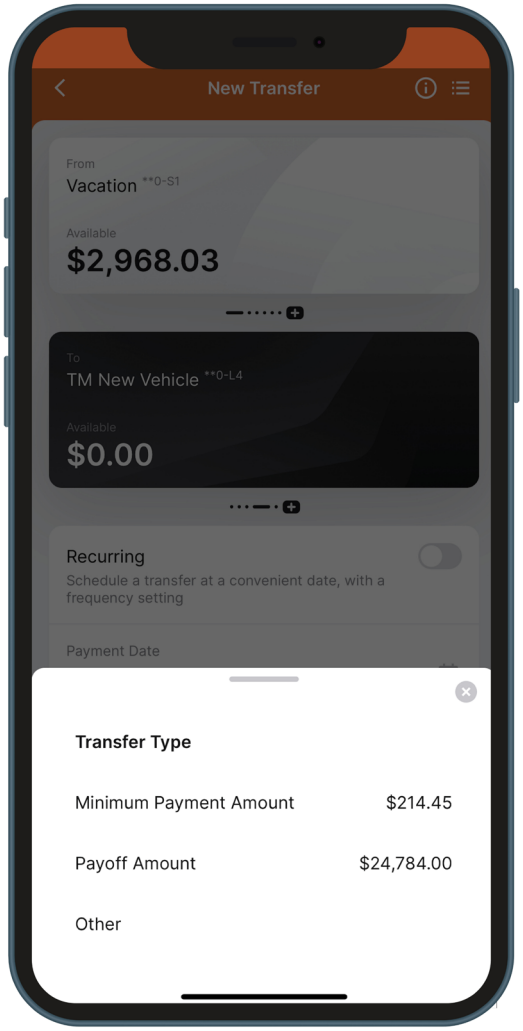
Toggle On to make this a recurring transfer if you wish.
Once it's set to On, the required fields become available.

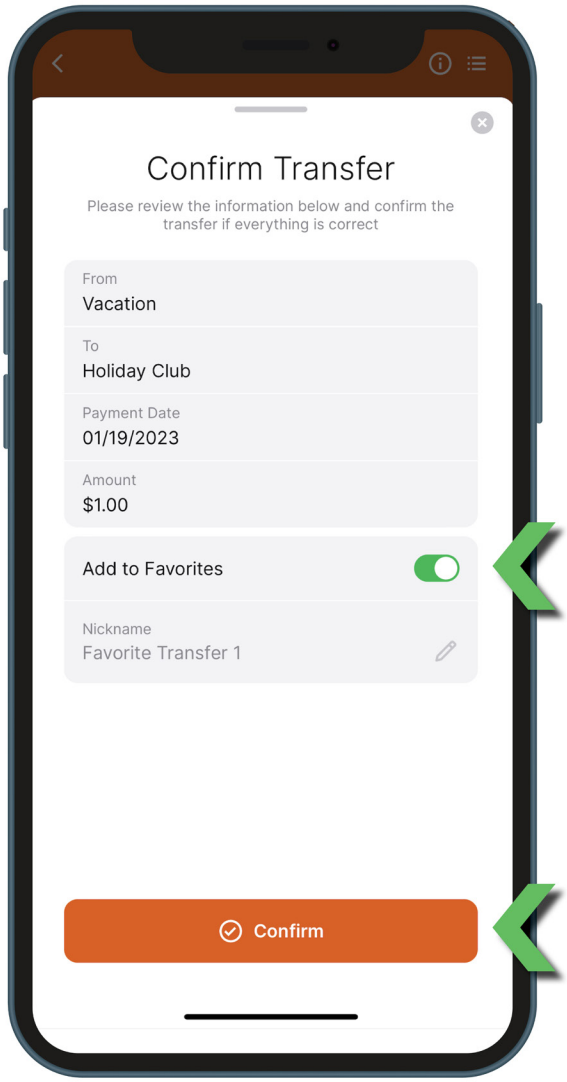


Transfer Type

This is a loan-specific field, that will allow you to select the minimum or regular payment on the loan, so that you do not have to remember the amount. You can also tap “other” and make a payment of your choice.





Confirm and Add to Favorites if You Wish!


Once the transfer details are completed, you will have the option of adding the transfer to your Favorites list. Then just tap confirm and you are done!
